

QUADRAS[®]STEP SYSTEM

Four simple steps to choosing a custom to foot type orthosis...

The different shapes and positions of our feet should allow us to move naturally as we walk and run. Observational evidence has shown that there are four key features that will influence how our feet work. Different combinations of these features can lead to common painful symptoms.

The QUADRAS[®]STEP SYSTEM shows how these physical and functional patterns can be identified to allow practitioners to treat problems with an orthosis that is uniquely suited to each combination.
